

Turn doubt into evidence before publishing.

A trusted-source evidence workspace for journalists before publication.

PROBLEM CASE

A fake visual became news before evidence caught up.

The Kamchatka snow story shows the failure: a vivid AI-generated claim crossed platforms and newsrooms before the evidence trail was checked.

The deadline is five minutes. The standard is 100%.

"maximum five minutes"

The newsroom needs a visible source boundary before publication.

SOLUTION

Lookitup turns trusted sources into a claim-checking workspace.

The product does one thing on stage: it finds source-bound Evidence Cards for one doubtful claim.

LIVE DEMO

One claim moves through one source boundary.
